

# ERRATUM

The OzFoodNet quarterly report, 1 July to 30 September 2010, published in the last issue of CDI, contained an error in Table 2. The table incorrectly stated that 36 persons were hospitalised due to a foodborne disease outbreak. The number hospitalised was actually unknown. The correct portion of the table is republished below.

**Table 2: Outbreaks of foodborne disease reported, 1 July to 30 September 2010 (n = 34), by OzFoodNet sites**

| State or territory | Month of outbreak | Setting prepared   | Agent responsible | Number affected | Hospitalised | Evidence | Responsible vehicles                  |
|--------------------|-------------------|--------------------|-------------------|-----------------|--------------|----------|---------------------------------------|
| Tas                | July              | Aged care facility | Norovirus         | 76              | Unknown      | A        | Suspected pork sausage and gravy meal |
