

Email Submission: Murdoch University Institutional Biosafety Committee

Good morning

Further to your email below, I wish to advise that the IBC at Murdoch University prefers –

- Option 2 – amend the GT Regulations by introducing all elements of the draft amendments, as detailed in full in section 3 of the Consultation RIS

The Murdoch University IBC would also like to make further comment, that in order to decrease regulatory burdens, NLRD licences could have a process for making minor amendments without the need to submit a new application form.

Kind regards
Sarah
