Description: Questionnaire issued to laboratories on 4 February 2008. It was a Participant Survey regarding the RCPA SQAP HPV Module. The Questionnaire informed the Participant that the RCPA Serology QAP is in the process of organising their specimens for the HPV Pilot Study and seeking their feedback to the following questions to determine how your laboratory performs HPV DNA Testing. The answers were designed to help the organisation prepare the specimens and inform the way in which the questionnaire and report would be prepared. The questions were

- What method does your laboratory use for testing of HPV DNA e.g. Digene, Roche, in-house method?
- Does your laboratory screen or type HPV DNA?
- How many years has your laboratory performed HPV DNA testing?
- How many HPV DNA tests does your laboratory perform per month?

The participant is asked to provide their participant number.

The questionnaire thanks the participant for taking the time to complete the information and advises if they have any further queries to please comment below in the space provided.

The participant can complete the answers directly on the form and email back to sqap@rcpaqap.com.au or return via fax to +61 2 9779 5916.

You can complete your answers directly on this form and forward the email back to sqap@rcpaqap.com.au or return via fax to +61 2 9779 5916.

Participant Number  ________________

What method does your laboratory use for the testing of HPV DNA?  ________________

eg Digene, Roche, in-house method

Does your laboratory screen or type HPV DNA?  ________________

How many years has your laboratory performed HPV DNA testing?  ________________

How many HPV DNA tests does your laboratory perform per month?  ________________

Thank you for your time completing this information. If you have any further queries please comment below.
